

1. izmjerite udaljenost između poda i stropa
2. između zidova
3. udaljenost od kutova do vrata
-
- The diagram shows a room with a door on the left wall and a window on the right wall. Three measurement lines are indicated: a vertical line on the right wall labeled '1.' representing the height from floor to ceiling; a horizontal line at the top labeled '2.' representing the distance between the side walls; and a horizontal line at the bottom labeled '3.' representing the distance from the corners to the door frame.

4. izmjerite svaki prozor i njegovu udaljenost od poda, stropa i kutova
5. vrata izmjerite na isti način
-
- The diagram illustrates the measurement points for a door and a window. The door is labeled '5.' and the window is labeled '4.'. Arrows indicate measurements for height, width, and distance from the floor/ceiling and corners.

6. zabilježite sve poput
radijatora, ventilacijskog otvora i cijevi
- obilježite položaj odvoda i vodoopskrbe
- izmjerite i obilježite položaj postojećih utičnica
i prekidača za svjetlo
- 
- The diagram shows a corner of a room with a wall and a floor. On the wall, there is a square vent (top right) and a rectangular window (middle left). On the floor, there is a rectangular outlet (bottom center) and two vertical pipes (bottom right). All these elements are circled in red. The number '6.' is written in the center of the room.
